Tutorial 3; Organic Chemistry

1. Draw the structure of (2R,3S)-2,3-dichloropentane (in bond-line/zig-zag formula):
2. Find the relation between A and B; C and D; E and F.

3. Which of the following Fischer projections is different from the other three?

4. Determine the most stable chair form of the following compounds by comparison between two conformers:
