

CH101 Tutorial Organic, 18.10.2023

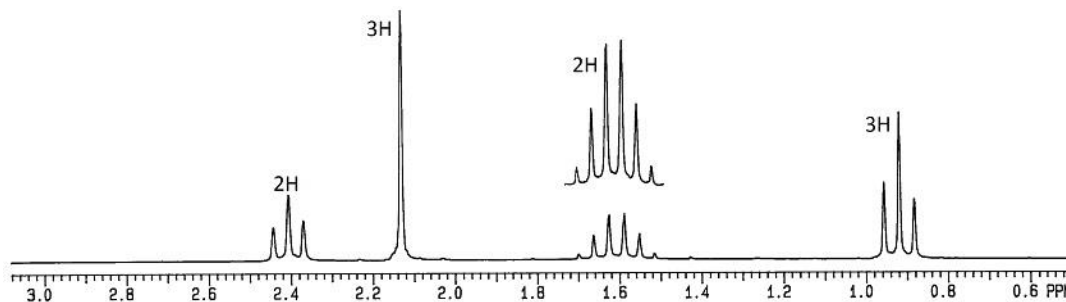

1. Based on the NMR and IR provided, what is the structure of **C₆H₁₀**?

2. The ¹H NMR spectrum of compound X (**C₄H₈O₂**) is shown below. It also shows a strong IR absorption band near 1730 cm⁻¹. Propose a structure for **X**.

3. A carbonyl compound with molecular formula **C₅H₁₀O** has NMR spectrum as shown below. Determine the structure of it.

4. Draw the ¹H NMR spectrum of 2-methylpropanal in CDCl₃.
